

# HORO Dr. Hofmann GmbH

## *Service and Support*

Aside the production and sales of our heating and drying cabinets we offer the following service:

- ✓ Repair and maintenance for all heating and drying cabinets
- ✓ Modification of the control and replacement of the temperature controller
- ✓ Calibration service
- ✓ Qualifying of heating and drying cabinets
- ✓ Safety inspections
- ✓ Data acquisition systems

For smaller heating and drying cabinets we suggest to do the service at our service point to avoid excessive cost. If transportation is not possible or the chamber is too large, an **on-site service** is available through our service team or through our service partners.

**Please get in touch with us  
to find the best service for you.**
